Washington, DC 20515

The Honorable Larry Bucshon, MD  
U.S. House of Representatives  
2313 Rayburn House Office Building  
Washington, DC 20515

Dear Representatives Bera and Bucshon,

On behalf of the undersigned organizations, representing over one million physician and non-physician health care clinicians, we applaud the introduction of H.R. 8800, the *Supporting Medicare Providers Act of 2022*. This critical legislation provides a 4.42% positive adjustment to the Medicare Physician Fee Schedule (MPFS) conversion factor (CF) for CY2023, thereby mitigating payment cuts within the MPFS that are anticipated to take effect on January 1, 2023. We look forward to working with you to ensure this legislation is enacted before the end of the year.

As you are aware, without Congressional action, the entire healthcare clinician community faces a cumulative payment reduction of approximately 8.5%, which includes both the CF changes, as well as a 4% Medicare cut stemming from the Statutory Pay-As-You-Go (PAYGO) Act. The 2% Medicare sequestration cuts that fully resumed earlier this year further exacerbates these payment reductions.

Additionally, the MPFS is the only payment system within Medicare without an annual inflationary update. This is particularly destabilizing as clinicians, many of whom are small business owners, contend with a wide range of shifting economic factors when determining their ability to provide care to Medicare beneficiaries. According to an American Medical Association analysis of Medicare Trustees data, when adjusted for inflation, Medicare physician payments have *declined* by 22% from 2001–2021.

The long-term consequence of failing to avert the cuts is less patient access to care. In fact, the 2021 Medicare Trustees Report expressed concern that, although the physician payment system put in place in 2015 avoided the significant short-range physician payment issues, it “nevertheless raises important long-range concerns that will almost certainly need to be addressed by future legislation.” The Trustees further stated, “In addition, the law specifies the physician payment updates for all years in the future, and these updates do not vary based on underlying economic conditions, nor are they expected to keep pace with the average rate of physician cost increases. Absent a change in the delivery system or level of update by subsequent legislation, the Trustees expect access to Medicare-participating physicians to become a significant issue in the long-term.”

As a result, our organizations strongly support H.R. 8800 as an essential step toward providing clinicians with financial stability and ensuring patients have access to critical services our members provide. Moving forward, we reiterate our commitment to working with you and your Congressional colleagues to identify and advance systemic Medicare payment reforms designed to ensure longer-term stability for clinicians, promote and reward value-based care, advance health equity and reduce disparities within the Medicare system.

Thank you again for your leadership on this issue.

Sincerely,
