**RE: 21<sup>st</sup> Century Cures Act**

Dear Speaker Ryan and Minority Leader Pelosi:

The undersigned members of the Physician Clinical Registry Coalition strongly support the provisions of the 21<sup>st</sup> Century Cures Act designed to encourage and facilitate the exchange of clinical outcomes data between electronic health record (EHR) technologies and “clinician-led clinical data registries,” including provisions to promote interoperability of clinical data and prevent EHR vendors from blocking the transmission of such data to third parties, such as clinician-led clinical data registries.

We particularly support the inclusion of language to require that EHR technologies, as a condition of certification by the Office of National Coordinator, be capable of sharing data with clinician-led clinical data registries. In addition, the language giving the HHS Inspector General the power to investigate and take enforcement action against improper information blocking by EHR technologies will give real teeth to these prohibitions. Collectively, these provisions will go a long way toward ensuring such registries can collect the data they need to improve the quality of care and follow-up treatment provided to patients.

We are pleased that we could play an integral part in the formation of the definition of “clinician-led clinical data registries,” as this term will be critical to ensuring that data from EHR technologies is shared with bona fide clinical data registries that are capable of collecting,

The Honorable Paul Ryan  
The Honorable Nancy Pelosi

securing, and analyzing patient information in a manner that truly promotes quality improvement and medical research.

In sum, we strongly support the provisions of the 21<sup>st</sup> Century Cures Act that give clinician-led clinical data registries efficient access to EHR data of their participating health care providers, while sending a strong message to EHR vendors that they will face potential prosecution and civil monetary penalties if they indiscriminately block such access.

Respectfully submitted,
