Genome Wide Association Study of Patients with History of Postpartum Hemorrhage

Vesela P. Kovacheva, M.D., Ph.D.

Brigham and Women's Hospital

Mentored Research Training Grant (MRTG)

9/1/2019

Postpartum hemorrhage (PPH) is the leading cause of maternal deaths. We aim to define maternal genetic variants by performing the first genome-wide association study of PPH. These results will identify novel targets for PPH prediction and therapy.
