## **Deciphering the Locus Coeruleus-Thalamic Circuit in Anesthetic Emergence**

**Li Li, M.D., Ph.D.**

**University of Washington**

**Mentored Research Training Grant (MRTG)**

**1/1/2020**

The proposal aims to better understand the role of the neural circuit between two brain regions, the locus coeruleus and thalamus, in waking up from general anesthesia using cutting-edge neuroscience techniques in a mouse model.
